

Dear Investigator:

The US Army Medical Research and Materiel Command (USAMRMC) Prostate Cancer Research Program (PCRP) is seeking input from the scientific community, including but not limited to PCRP applicants and awardees, in an effort to identify opportunities to enhance support for prostate cancer health disparity research. To continue to develop new program priorities and create funding opportunities by utilizing innovative and impactful ideas to address prostate cancer health disparities, the PCRP has issued a Request for Information (RFI).

Information provided in response to this RFI will be used by the PCRP for internal planning purposes only. Therefore, this RFI does not represent a solicitation for proposals or any obligation on the part of the Congressionally Directed Medical Research Programs (CDMRP) or the Department of Defense. The link to access the RFI is http://cdmrp.army.mil/pubs/news/pc_rfi.pdf. Responses are requested via email by August 31, 2009. All responses to the RFI will be confidential.

For all responses and questions pertaining to this RFI, please contact:

Carolyn J.M. Best, Ph.D.
Program Manager, Prostate Cancer Research Program
Congressionally Directed Medical Research Programs
(301) 619-7850
carolyn.best2@amedd.army.mil

We look forward to your participation in finding solutions that will conquer prostate cancer.
